34 + 53 = ?

Es gibt verschiedene Möglichkeiten, diese Aufgabe zu lösen. Hier zählen wir zuerst die **Zehner**, dann die **Einer** zusammen.

Wir brauchen drei Schritte:

1	Zehner und Zehner	30	+	50		80
2	Einer und Einer	4	+	3	_	7
3	Zehner und Einer	80	+	7	=	87

Beispiele:

$$18 + 61 = \rightarrow 10 + 60 = 70 \rightarrow 8 + 1 = 9 \rightarrow 70 + 9 = 79$$

$$62 + 27 = \rightarrow 60 + 20 = 80 \rightarrow 2 + 7 = 9 \rightarrow 80 + 9 = 89$$

$$45 + 43 = \rightarrow 40 + 40 = 80 \rightarrow 5 + 3 = 8 \rightarrow 80 + 8 = 88$$
